Quality Management System Registered to AS9100 and ISO 9001

May 11, 2018

Dear Customer,

This letter is in response to your request for information regarding RoHS restricted substances and the tubing manufactured by Precision Tube Company. The following statements are in support of your request.

Tubing manufactured by Precision Tube Company meets the specified requirements of the RoHS3 Directive 2015/863/EU and formerly met the requirements of 2002/95/EU since its implementation. None of the products contains lead in excess of 0.1%, cadmium in excess of 0.01%, or mercury in excess of 0.1%. In addition, the tubing does not contain any of the remaining listed constituents prohibited by this specification (i.e., Hexavalent Chromium, Polybrominated Biphenyl flame retardants, and Polybrominated Diphenyl Ether flame retardants, Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP) and Diisobutyl phthalate (DIBP).

We have asked our material suppliers to complete an evaluation of their materials formulations and the materials handling and processing procedures used to produce them. Based on the information provided to Precision Tube Company by its material suppliers and our review, to the best of our knowledge, after due inquiry, tubing provided by Precision Tube Company do not contain any RoHS restricted substances above the listed concentrations and would therefore be in compliance with the European RoHS Regulation.

Charles Blanton
